**TO PRESERVE
LARGE CUCUMBERS**

Quarter the cucumber lengthwise and cut into neat cubes. Place in an earthenware bowl in layers with dry **Al** Cooking Salt. Leave for 24 hours, stirring occasionally with a wooden spoon. Drain well. Pack into clean jars and cover with spiced vinegar. Cover the jars with non-metal caps.

TO PRESERVE

SMALL CUCUMBERS

Choose cucumbers of equal size. Place them in a saucepan and cover with brine, prepared by dissolving half a pound of **Al** Cooking Salt to three pints of water. Bring to simmering point and simmer for 10 minutes. Drain well and leave until cold. Pack into jars and cover with spiced vinegar. Cover the jars with non-metal caps or with lacquered metal caps.

The following method is rather more complicated, but gives a better colour preserve.

Soak for three days in brine. Drain off the brine, and repeat, using fresh brine, for another three days. Drain and soak in clear water with alum in the proportion of one dessertspoonful of alum to 2 quarts of water. Continue soaking for six hours. Drain well and simmer for 10 minutes in spiced vinegar. Pack into hot jars and cover with hot vinegar. Cover down when cold.

In these recipes the cucumber can be used peeled, or unpeeled according to taste.
